Forecast for Monday 22 Feb 2021

Weather: Any low cloud will soon lift and disperse in morning then a mostly dry and bright day with sunny long spells. Long clear spells in evening with a touch of frost in the glens.

Chance of cloud free mountain/hill tops above 800m: 90% or more.

Visibility: Perhaps patchy cloud overnight and at first in morning between 400 and 600m, otherwise cloud above the tops with good visibility at all levels.

Met Office Aberdeen Meteorologist's View

Quite mild and pleasant on lower slopes, especially in the sunshine, but windier and colder at height with a significant chill. Some glare off lying snow at higher levels.

Forecast for Tuesday 23 Feb 2021

Weather: Cloud thickening overnight to bring outbreaks of heavy rain, this falling as snow on the summits at first. Rain becoming persistent by morning, with possibly some very heavy rain bringing the risk of flooding to most parts. Perhaps a drier spell late morning and into the afternoon, with lighter and patchier rain, but further heavy and prolonged rain pushing up from the south by dusk. Very windy and wet at times leading to extremely difficult conditions.

Maximum wind: Southerly, turning southwest for a time, perhaps only 25-35 gust 45mph at low levels, but 45-65mph, with gusts 85 mph at height bringing mobility issues and risk of being blown over.

Chance of cloud free mountain/hill tops above 800m: Generally little chance

Visibility: Generally poor or very poor at height with areas of cloud above 500-600m, but broken 800m at times over Aberdeenshire hills. Also poor at times beneath cloud in rain.

Temperature: **Glens:** Plus 6C rising to plus 10 or 11C
At 800m: Plus 4 to 6C
Freezing level: 800m in early hours, but above the tops by morning
